KIK'S SUBSCRIBER DATA GLOSSARY

Thanks for checking out our glossary for subscriber data responses. Kik data can be tough to interpret, and we hope this glossary will be a useful tool for you. It includes an explanation of the data included in our response to your Order.

If you have questions about the data that aren't answered in our glossary, you can reach us at lawenforcement@kik.com.

KIK'S SUBSCRIBER DATA GLOSSARY

Subscriber data

Subscriber data is provided in response to a valid Order (i.e., a subpoena or warrant issued or an order made by a court, person or body with jurisdiction to compel the production of information) and includes:

- Basic subscriber information provided by the user, such as first and last name, email address, and link to current profile picture. *This information isn't verified by Kik, meaning that we don't have any way to know if it's accurate.*
- Device related information. *This information varies depending on device type.*
- Kik account information such as account creation date and version.
- User location information, including most recent IP address (after November 2013).

We collect IP address information up to 30 days old (because we need it to process messages sent within Kik Messenger), but *this information is provided by third parties and isn't verified by Kik.*

Below is a list of commonly found terms within subscriber data responses:

Metrics	Includes current account information such as username, first name, last name and email address, which are entered by the user and not verified by Kik. Email addresses may be either confirmed, or unconfirmed. "Confirmed" means the user received a verification email from Kik and clicked on the link within the email. "Unconfirmed" means either the email address is invalid, or the user received the email but did not click on the link within the email.
BINDING_INFO	User opens app forces a connection to Kik.
PROFILE_PIC_URL	Link to the user's current profile picture. Top link is for a large sized photo and bottom link is for a thumbnail sized photo. If the user has deactivated their account, the profile link produces an error message.
CLIENT_VERSION	Indicates the version of Kik that the user is using and the dates on which the user updated versions.
REGISTRATION_CLIENT_INFO	Includes device related information such as the country code the user entered on the device, the

KIK'S SUBSCRIBER DATA GLOSSARY

	type, model, language and prefix. (CIP = iPhone; CAN = Android)
REGISTRATION_TIMESTAMP	The timestamp in Eastern Standard Time that the user registered their Kik account.
USER_LOCATION	Last known IP address of the user, including city, lat and long, and timezone. Kik obtains this information via third party and it is not verified.
Date/time	Date and time are in Eastern Standard Time.
Timestamp	Timestamps are in Unix Time (GMT)
Packet ID	Unique server ID per event, ie. Retransmitted messages will have the same packet ID.
Device	Device type that was used at the time of the event.
Extra Data	A comma separated list of event type specific key/value pairs. Key/values are delimited with '#'. Some keys are self explanatory (Ex. 'IP' means IP Address) but most aren't since we abbreviate heavily to save storage costs.
jid	Username_xxx where 'xxx' are three random characters assigned by Kik systems.
